Workflow Exploration Report

API Documentation and Service Status

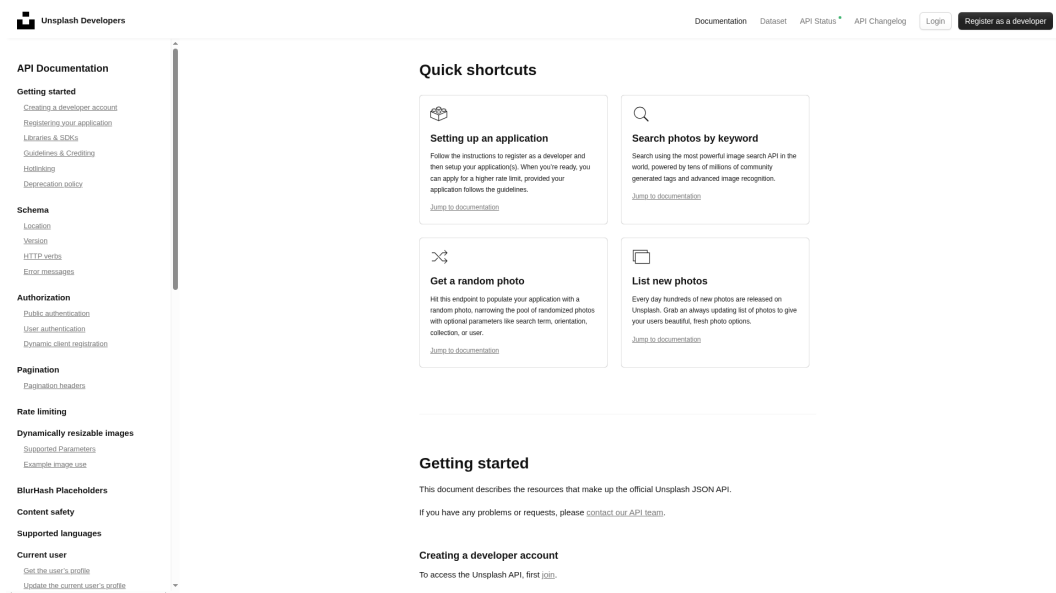

Website: <https://unsplash.com>

Feature Area: Developer Portal

Goal: Navigate the developer portal to find specific API documentation and check system health. Success: Documentation and status page are visible.

Generated: April 07, 2026 at 07:54 AM

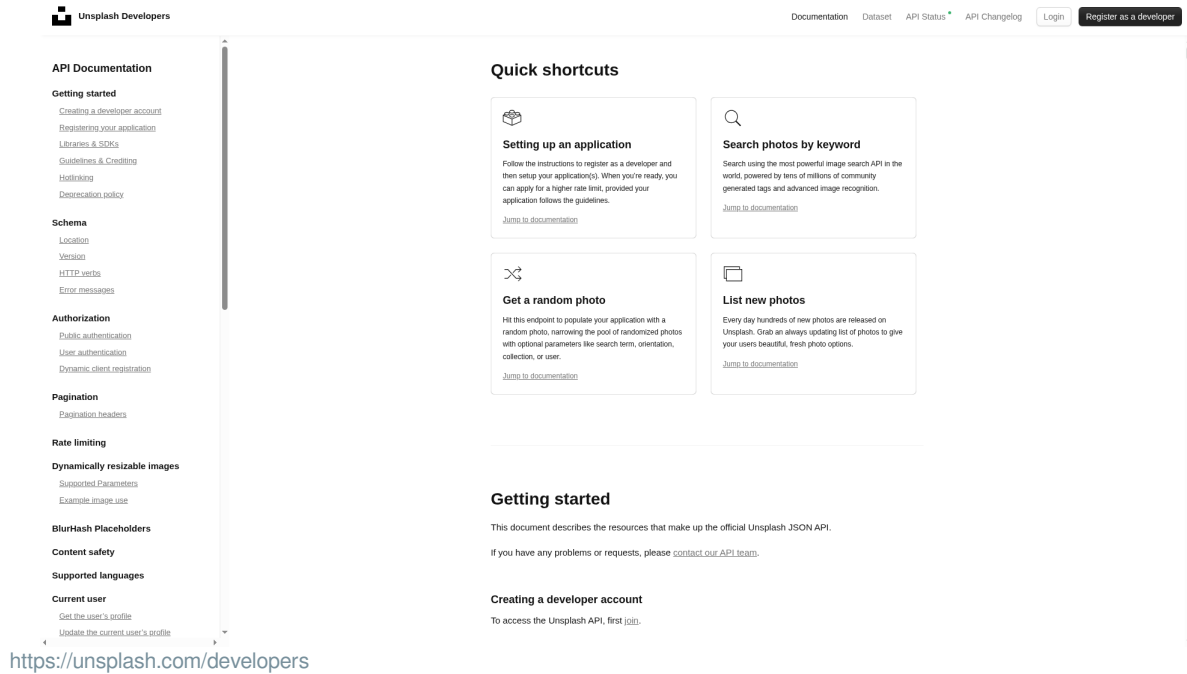

The AI successfully navigated the Unsplash Developer Portal to locate the 'Search photos' API documentation, including its request parameters and response schema. It then verified the real-time system health on the status page, confirming all services were operational, and accessed the subscription options for status updates.

Step-by-Step Walkthrough

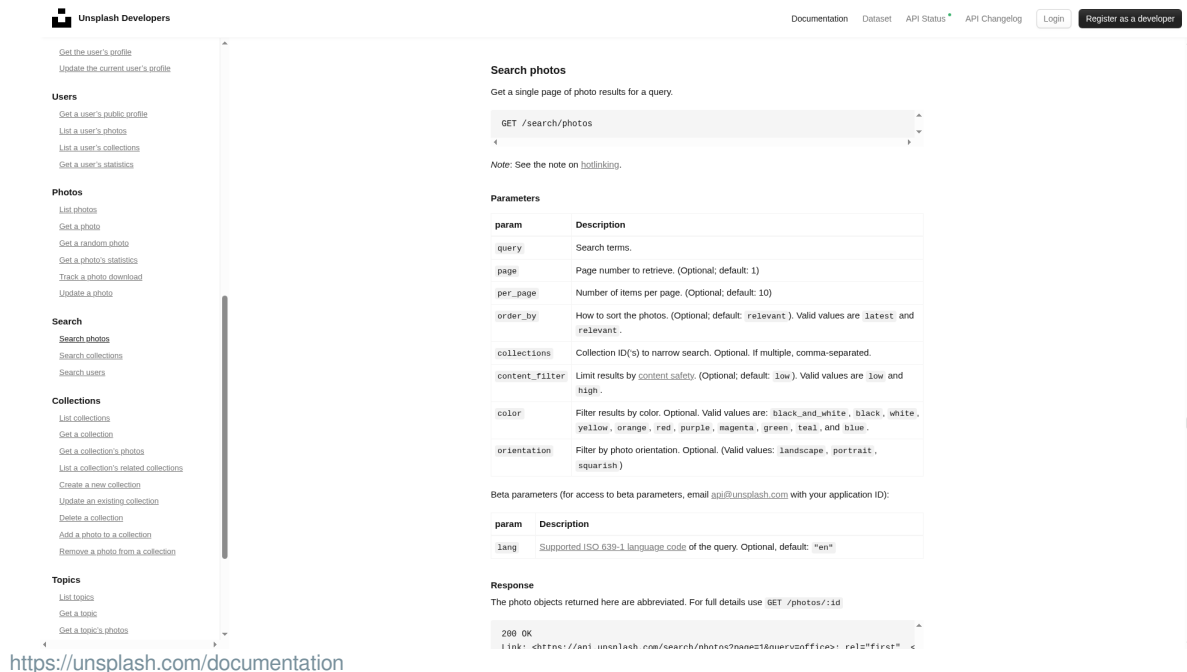

1. Unsplash Developer Portal Landing Page

The AI navigates to the Unsplash Developers homepage to begin the workflow.

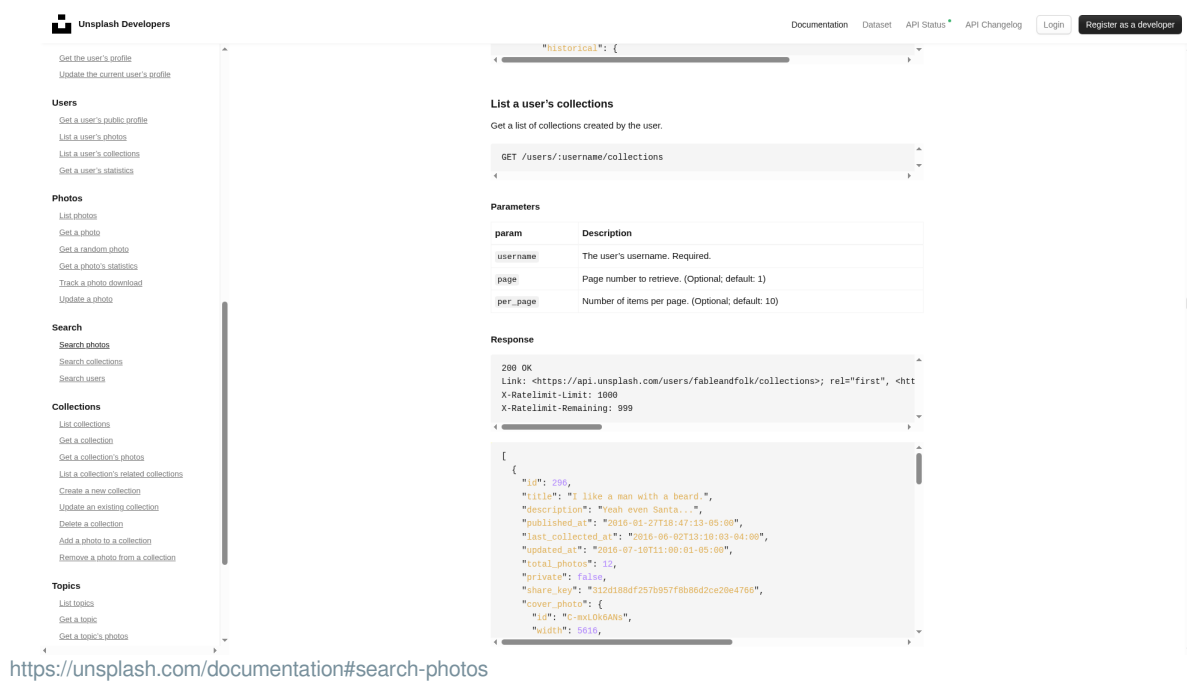

2. Accessing API Documentation

The AI clicks on the documentation link to view the available API resources and guides.

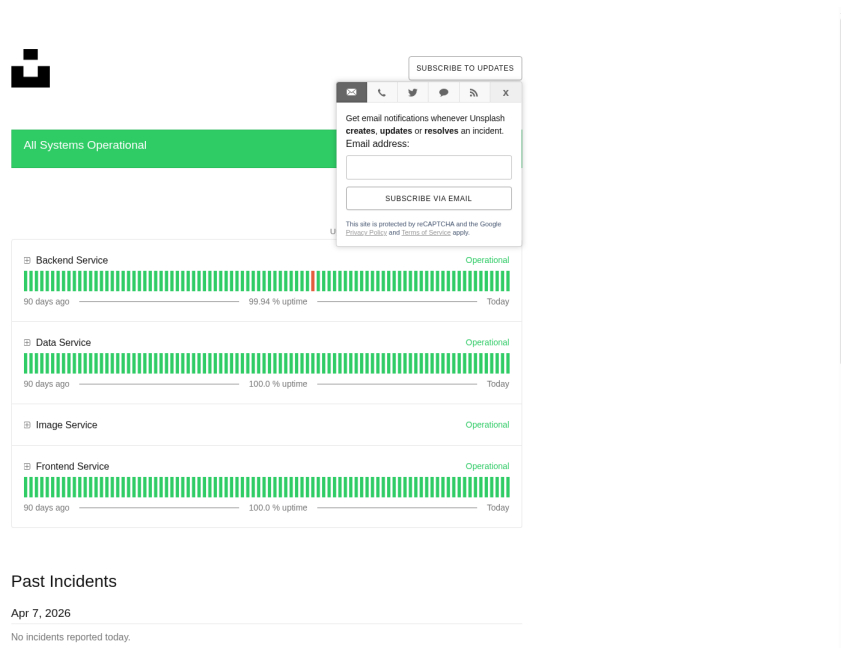

3. Viewing Search Photos Endpoint Details

The AI navigates to the 'Search photos' section to review request parameters and endpoint specifications.

4. Checking System Operational Status

The AI visits the Unsplash status page to verify that all backend and frontend services are operational.

API Documentation and Service Status

Navigate the developer portal to find specific API documentation and check system health. Success: Documentation and status page are visible.

The AI successfully navigated the Unsplash Developer Portal to locate the 'Search photos' API documentation, including its request parameters and response schema. It then verified the real-time system health on the status page, confirming all services were operational, and accessed the subscription options for status updates.

- Navigate to <https://unsplash.com/developers>
- Click 'View the documentation'
- Click 'Search photos' in the left sidebar to view endpoint details
- Navigate back to the Developer home and click 'API Status' in the footer
- Verify that <https://status.unsplash.com/> shows 'All Systems Operational'.
