

# ROOST AI

## Workflow Exploration Report

### Unsplash+ Subscription Discovery

Website: <https://unsplash.com>

Feature Area: Unsplash+

Goal: Navigate to the Unsplash+ landing page to view premium benefits. Success: Unsplash+ landing page is displayed.

Generated: April 07, 2026 at 07:01 AM

Confidence: 90%

The AI attempted to navigate to the Unsplash+ landing page to view premium benefits but was repeatedly blocked by an automated security system. Despite trying different entry points and direct URL navigation, the 'Access Denied' state persisted throughout the entire session.

Oh noes!

Access Denied: error code 4d1dbaddfc0f385.

# Step-by-Step Walkthrough

## 1. Access Denied on Initial Navigation

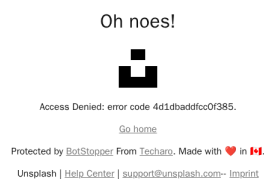

The AI navigates to the Unsplash homepage and is immediately met with an 'Access Denied' error page from the site's security provider.

## 2. Persistent Block on Unsplash+ Page

The AI attempts to bypass the initial block by navigating directly to the Unsplash+ subpage, but the security restriction remains active.

## Discovered Test Scenarios

| # | Scenario                                                         | Type         | Priority |
|---|------------------------------------------------------------------|--------------|----------|
| 1 | Discovered Workflow: Unsplash+ Subscription Discovery -- Partial | partial_flow | medium   |

## Discovered Workflow: Unsplash+ Subscription Discovery -- Partial

Attempted navigation to Unsplash+ landing page which was interrupted by a persistent access block.

The agent attempted to reach the Unsplash+ landing page through multiple methods: initial navigation to the homepage, direct navigation to the /plus subpage, and an external referral attempt via Google. In all instances, the agent encountered a persistent access restriction, preventing the verification of premium features.

- The test currently reflects a blocked state. If running in a CI environment, ensure IP addresses are allow-listed or bot detection is handled.
- Use `page.goto()` for the primary navigation steps as recorded.
- The 'Go home' link (Selector Index 88) is available on the error/block page and can be used to verify the presence of the restriction.
