Workflow Exploration Report

Developer Registration Flow

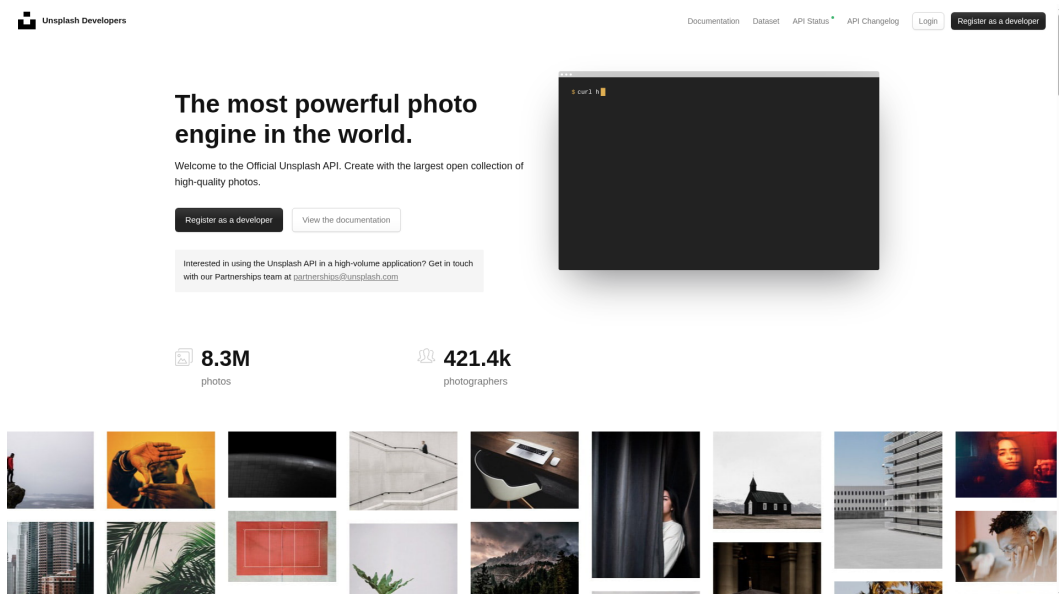

Website: <https://unsplash.com>

Feature Area: Developer Portal

Goal: Initiate the process to register as a developer. Success: Reach the registration form.

Generated: April 07, 2026 at 06:41 AM

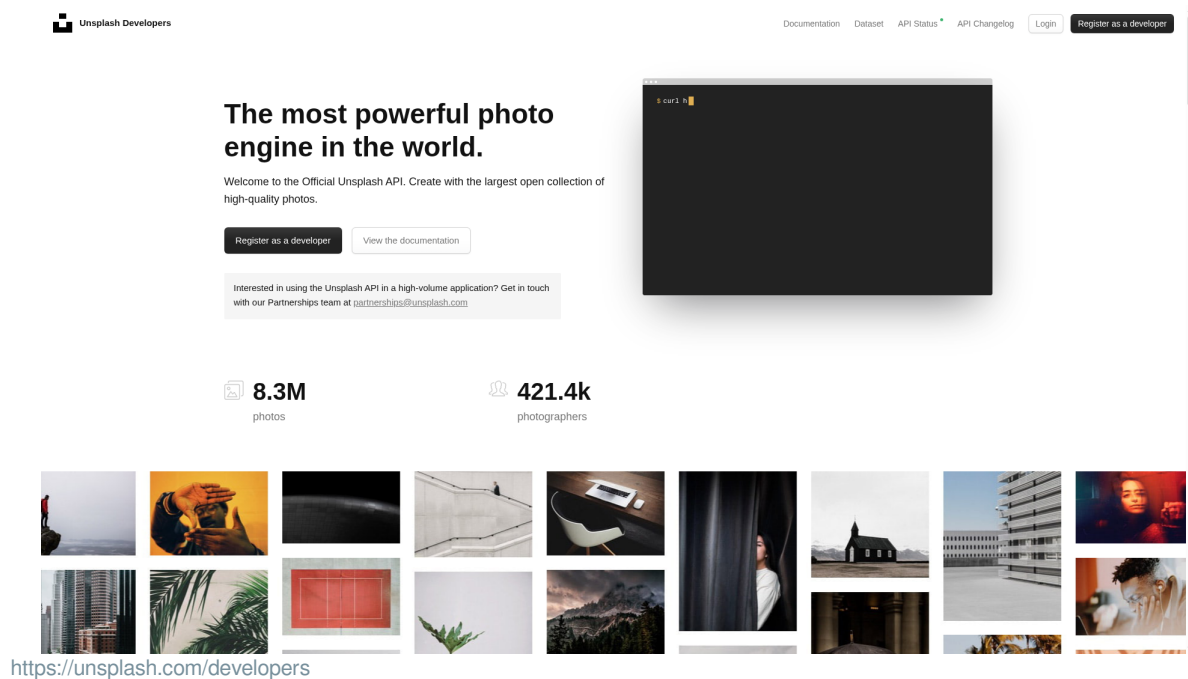

The AI explored the Unsplash Developer Portal, navigating through technical documentation, API guidelines, and dataset access options. While it successfully reviewed the API changelog and technical requirements for hotlinking, the final attempt to access the developer registration form was blocked by automated bot detection security.

Step-by-Step Walkthrough

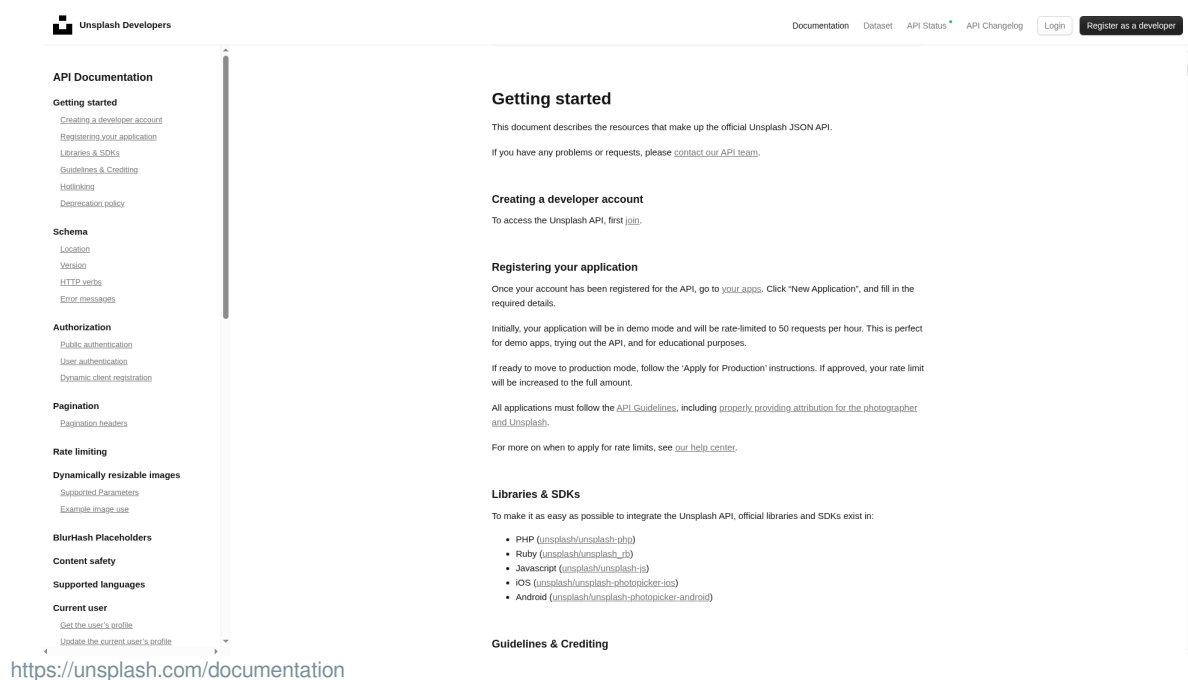

1. Unsplash Developer Portal Landing Page

The AI navigates to the Unsplash Developers homepage to begin the exploration of the API ecosystem.

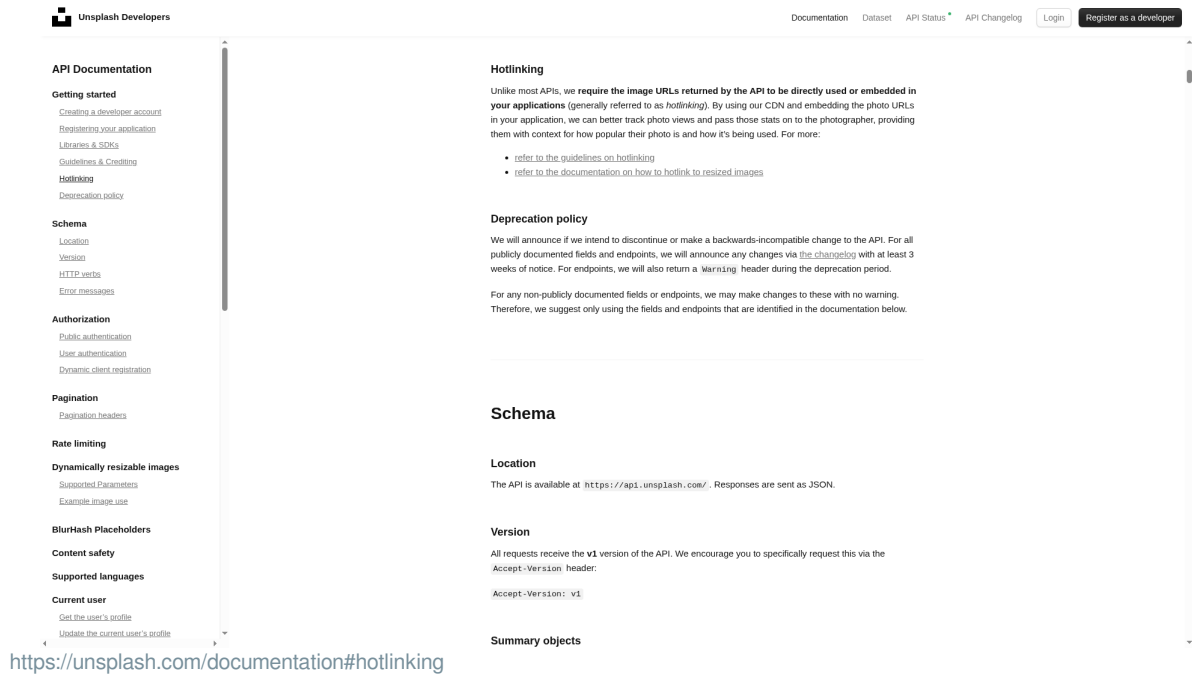

2. Reviewing API Getting Started Guide

The AI accesses the documentation to understand the initial steps for creating a developer account and registering an application.

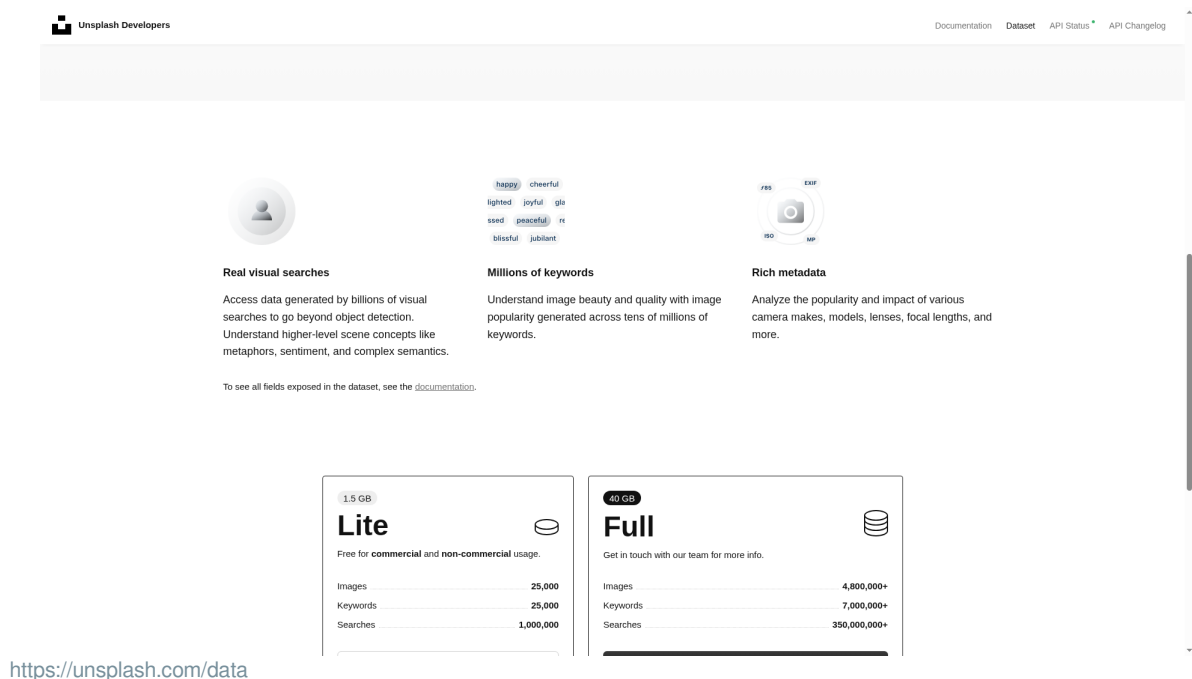

3. Examining Hotlinking Technical Requirements

The AI deep-dives into the documentation to extract technical requirements for image embedding and CDN usage.

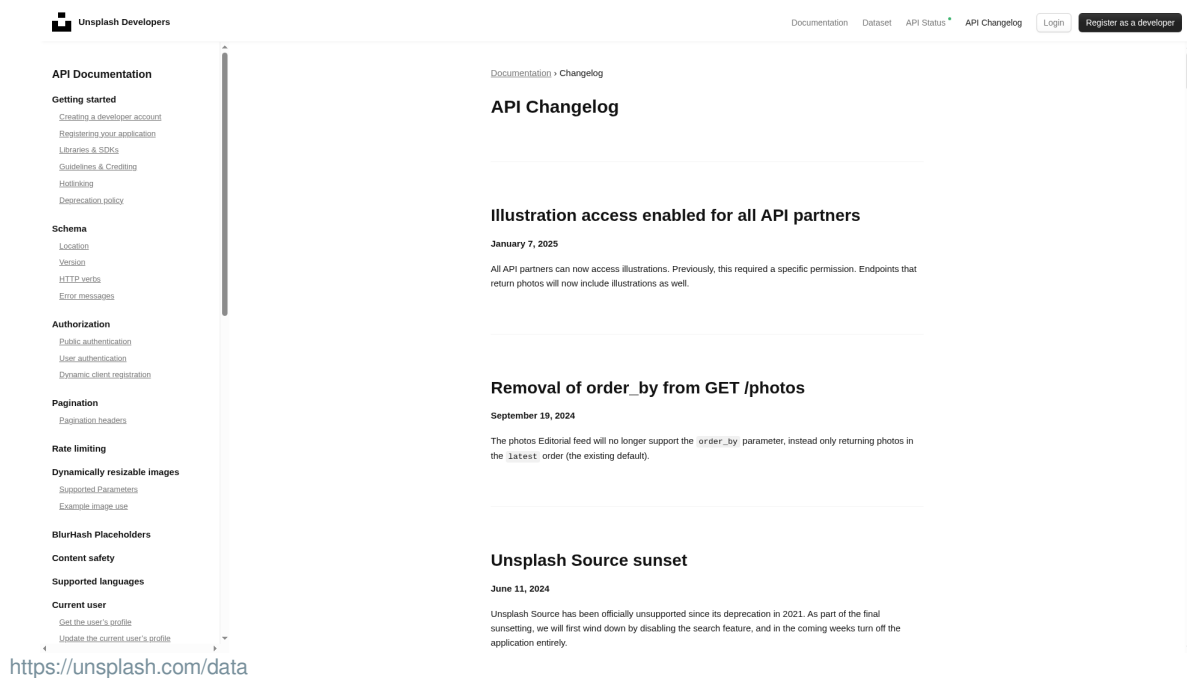

4. Exploring Unsplash Dataset Options

The AI navigates to the dataset section to view the differences between the Lite and Full access versions.

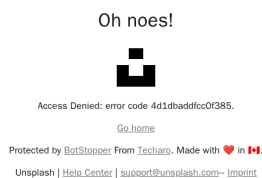

5. Viewing the API Changelog

The AI reviews the chronological list of API updates, including recent changes to illustration access and parameter removals.

6. Registration Blocked by Security

The final step to register as a developer is interrupted by a 'BotStopper' access denied screen, preventing further progress.
