The AI successfully navigated the Unsplash Blog and demonstrated the ability to filter content by categories such as Product, Announcements, and Unsplash+. It verified the full article reading experience by opening a specific post and confirmed that the pagination system correctly loads additional content via the 'Load more posts' button.

Step-by-Step Walkthrough

1. Accessing the Unsplash Blog

The AI navigates to the Unsplash Blog home page to begin the exploration of community stories and featured updates.

2. Filtering by Product Category

The AI selects the 'Product' category from the navigation menu, successfully filtering the feed to show design and engineering articles.

3. Reading a Specific Article

The AI opens the article 'You can now filter images by license' to verify that the full content, featured image, and author attribution load correctly.

4. Testing Pagination Feature

The AI scrolls to the bottom of the article list to locate and interact with the 'Load more posts' button.
