Workflow Exploration Report

Access Developer API Documentation

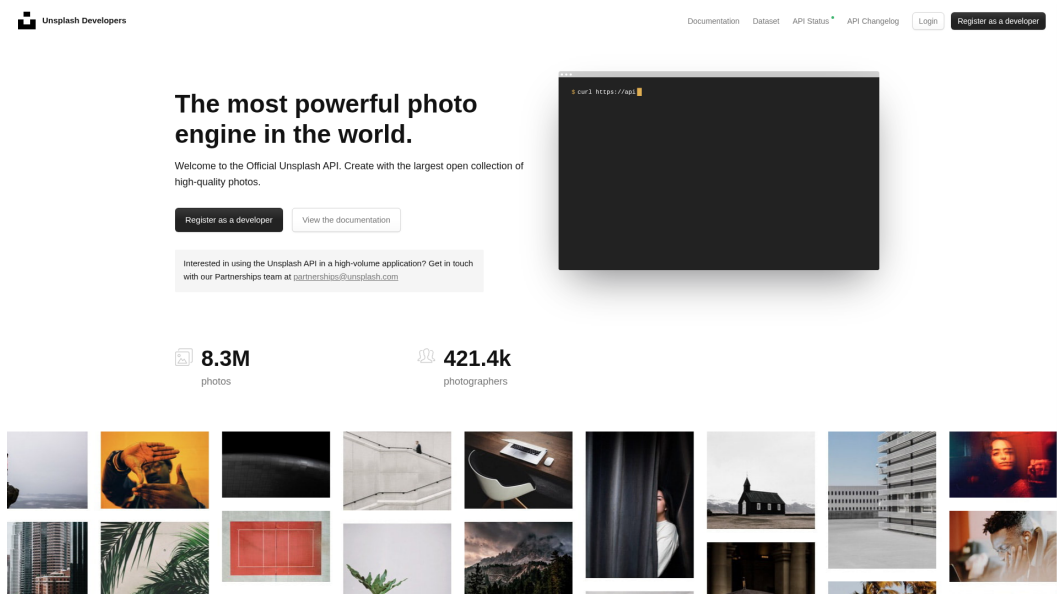

Website: <https://unsplash.com>

Feature Area: Developer Portal

Goal: Navigate from the developer portal to the technical API documentation. Success: Documentation site loads.

Generated: April 07, 2026 at 12:22 PM

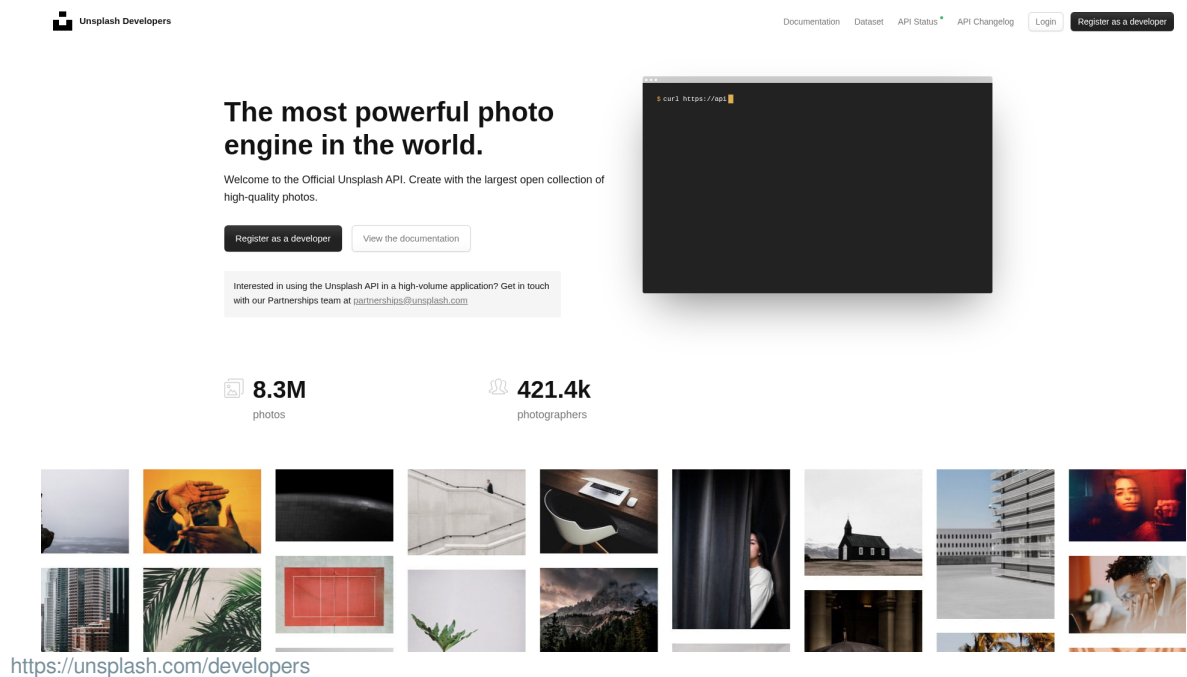

The AI successfully navigated the Unsplash Developer Portal to access technical documentation, system status, and the API changelog. While it successfully reached the dataset and registration sections, further progression was limited by bot detection on the sign-up page and loading issues on external redirect sites.

Step-by-Step Walkthrough

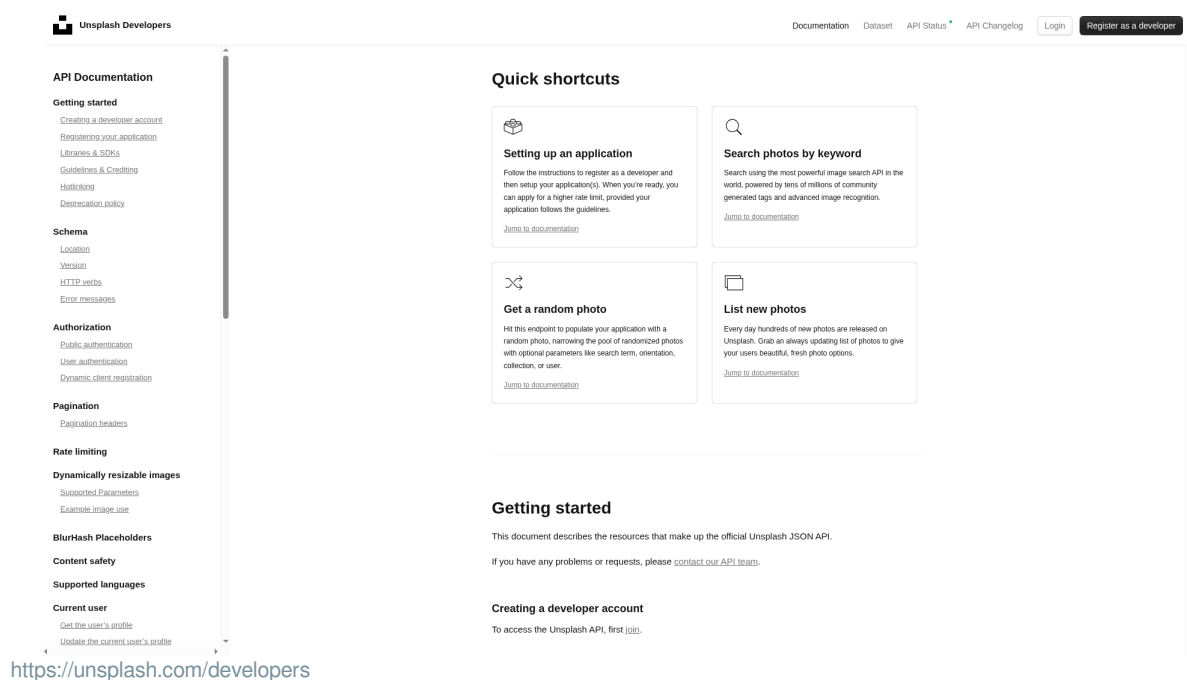

1. Unsplash Developer Portal Landing Page

The AI begins the workflow on the main Unsplash Developers home page.

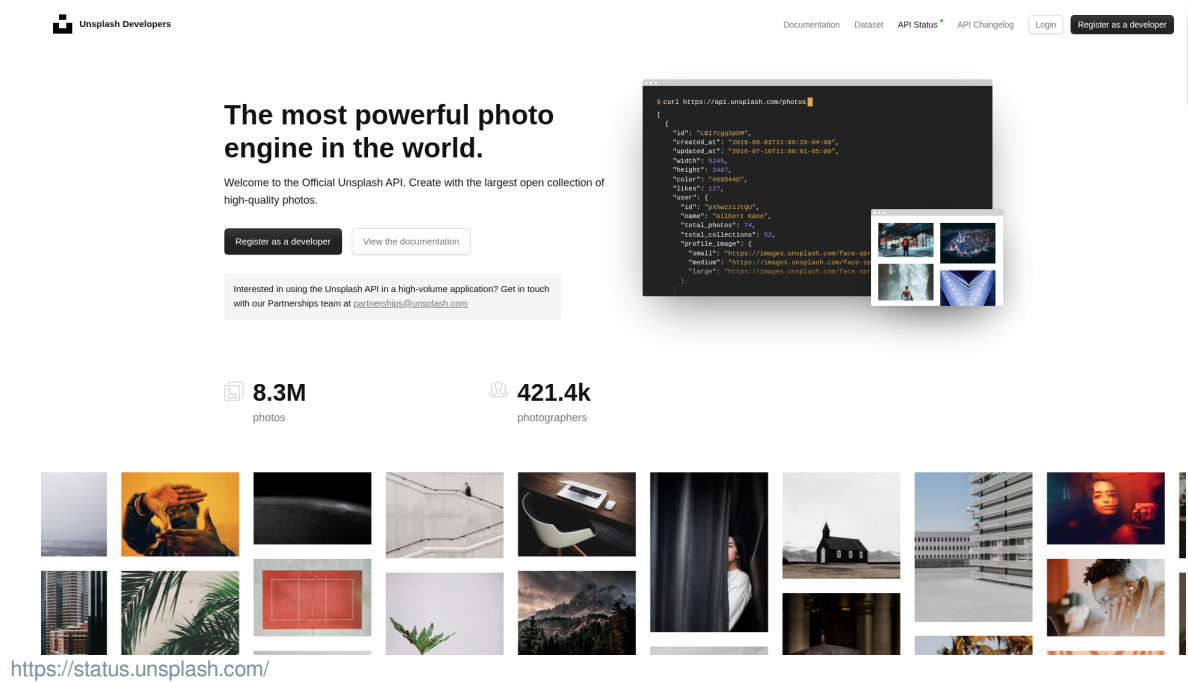

2. Technical API Documentation

The AI navigates to the comprehensive API documentation, showing quick shortcuts and getting started guides.

3. API System Status

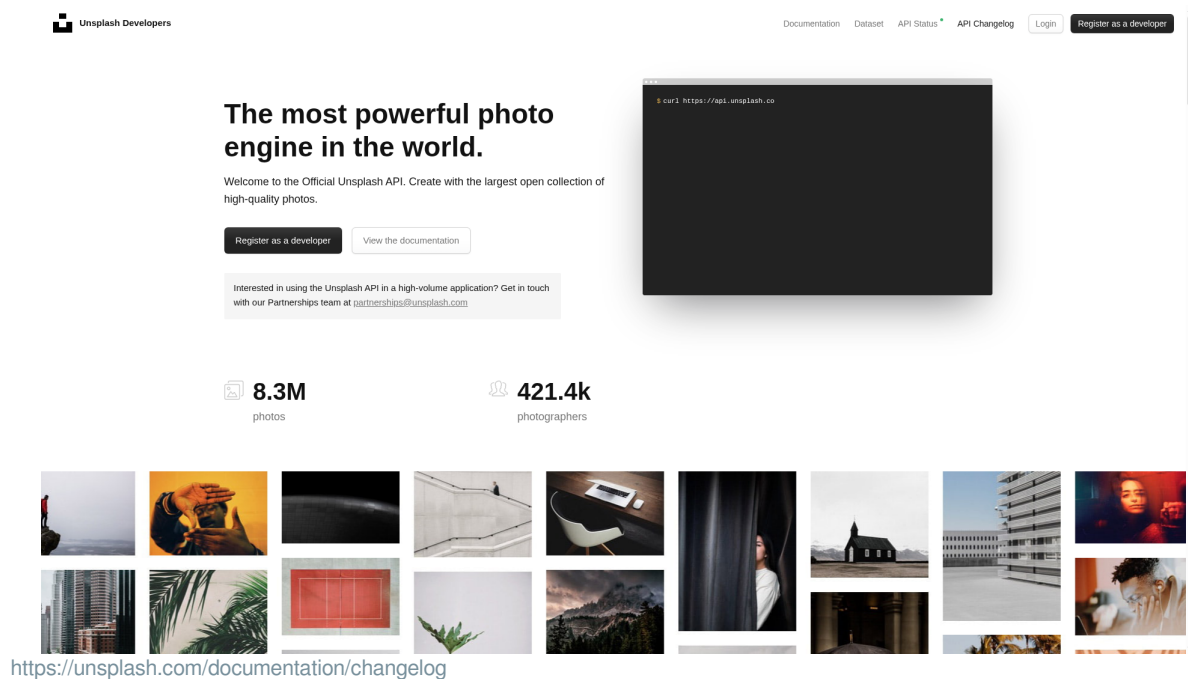

The AI checks the operational health of the Unsplash API services, confirming all systems are functional.

5. Registration Blocked by Bot Detection

An attempt to access the developer registration page is intercepted by BotStopper security.

6. Dataset Access Options

The AI navigates to the data portal to view options for downloading the Lite or Full Unsplash datasets.

Discovered Test Scenarios

#	Scenario	Type	Priority
1	Access Developer API Documentation	preview	medium

Access Developer API Documentation

Navigate from the developer portal to the technical API documentation. Success: Documentation site loads.

The AI successfully navigated the Unsplash Developer Portal to access technical documentation, system status, and the API changelog. While it successfully reached the dataset and registration sections, further progression was limited by bot detection on the sign-up page and loading issues on external redirect sites.

- Navigate to <https://unsplash.com/developers>
- Click the 'View the documentation' button
- Verify the browser navigates to the Unsplash API documentation page.
