Feature Area: Developer Portal

Goal: Access the open-source dataset for research or development. Success: Redirected to the dataset repository.

Generated: April 07, 2026 at 12:23 PM

The AI navigated the Unsplash Developer Portal to access the open-source Lite dataset for research and development. It successfully verified the documentation, system status, and API changelog before reaching the dataset section, despite encountering bot detection during a registration attempt.

Step-by-Step Walkthrough

1. Unsplash Developer Portal

The AI navigates to the Unsplash Developers landing page to begin exploring available resources.

2. Accessing API Documentation

The AI opens the documentation page to verify that technical guides and API references are accessible.

3. Verifying System Status

The AI checks the status page to ensure that all Unsplash API services are currently operational.

4. Reviewing the API Changelog

The AI navigates to the changelog to review the chronological history of API updates and modifications.

The screenshot shows the 'API Changelog' page on the Unsplash Developers site. The left sidebar contains a navigation menu with categories like 'API Documentation', 'Getting started', 'Schema', 'Authorization', 'Pagination', 'Rate limiting', 'Dynamically resizable images', 'Blurred Placeholders', 'Content safety', 'Supported languages', and 'Current user'. The main content area lists three changelog entries: 'Illustration access enabled for all API partners' (January 7, 2025), 'Removal of order_by from GET /photos' (September 19, 2024), and 'Unsplash Source sunset' (June 11, 2024). Each entry includes a brief description of the change.

6. Navigating to Unsplash Datasets

The AI accesses the dataset section of the portal to find open-source image data for research.

The screenshot shows the 'Unsplash Developers' page. At the top, there's a navigation bar with links for 'Documentation', 'Dataset', 'API Status', and 'API Changelog'. Below this, there are three main sections: 'Real visual searches', 'Millions of keywords', and 'Rich metadata'. Each section has a brief description of the data available. At the bottom, there are two large cards for 'Lite' and 'Full' dataset options. The 'Lite' card is 1.5 GB and is free for commercial and non-commercial usage. The 'Full' card is 40 GB and requires getting in touch with the team for more info. Both cards list the number of images, keywords, and searches available.

Dataset	Size	Images	Keywords	Searches
Lite	1.5 GB	25,000	25,000	1,000,000
Full	40 GB	4,800,000+	7,000,000+	350,000,000+
