Workflow Exploration Report

Search and Discover Photos

Website: <https://unsplash.com>

Feature Area: Visual Content Discovery

Goal: Search for specific content and browse results via categories. Note: Blocked by bot detection for automated agents.

Generated: May 21, 2026 at 06:24 PM

The AI attempted to perform a search and discovery workflow on Unsplash.com but was consistently blocked by the site's bot protection service, BotStopper. Despite trying over a dozen different entry points and search terms, the automated agent was denied access to all primary content pages. Only the Help Center remained accessible, preventing the completion of any visual content discovery tasks.

Oh noes!

Access Denied: error code 4d1dbaddfcc0f385.

Step-by-Step Walkthrough

1. Access Denied on Homepage

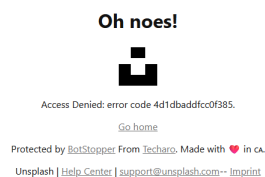

The AI navigates to the Unsplash homepage and is immediately met with an 'Access Denied' screen from the BotStopper protection service.

3. Successful Navigation to Help Center

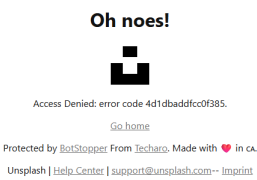

The AI successfully accesses the Unsplash Help Center, which is the only section of the site that allowed automated access.

4. Persistent Blocking Across Site

Further attempts to access the 'About' page and other discovery features continue to result in the same persistent access denial error.
