Workflow Exploration Report

Developer Portal: API Documentation Exploration

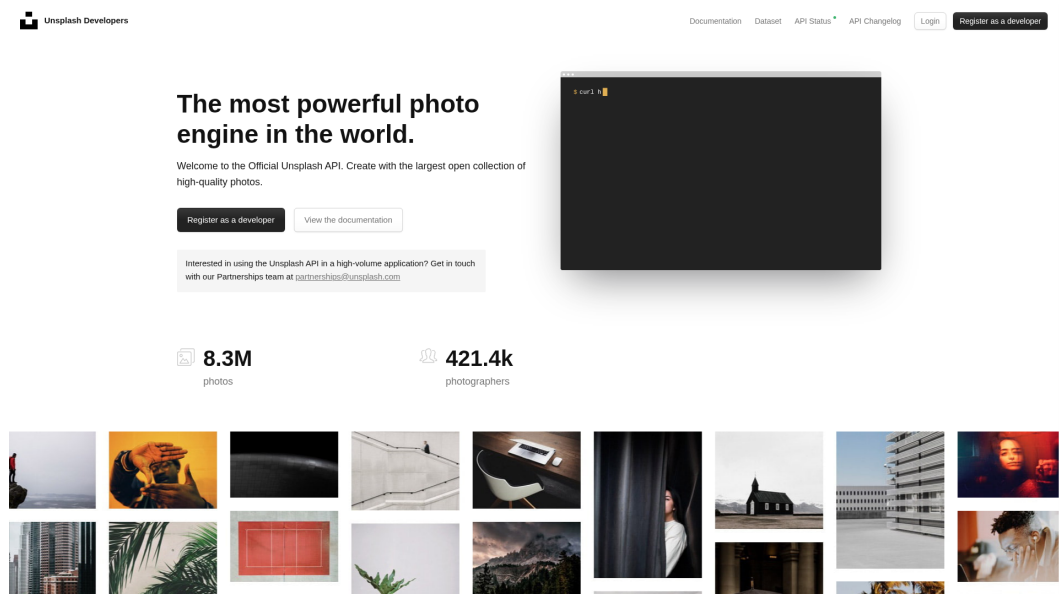

Website: <https://unsplash.com>

Feature Area: Developer Portal

Goal: Navigate technical documentation for image integration. Success: Hotlinking requirements are visible.

Generated: April 07, 2026 at 06:41 AM

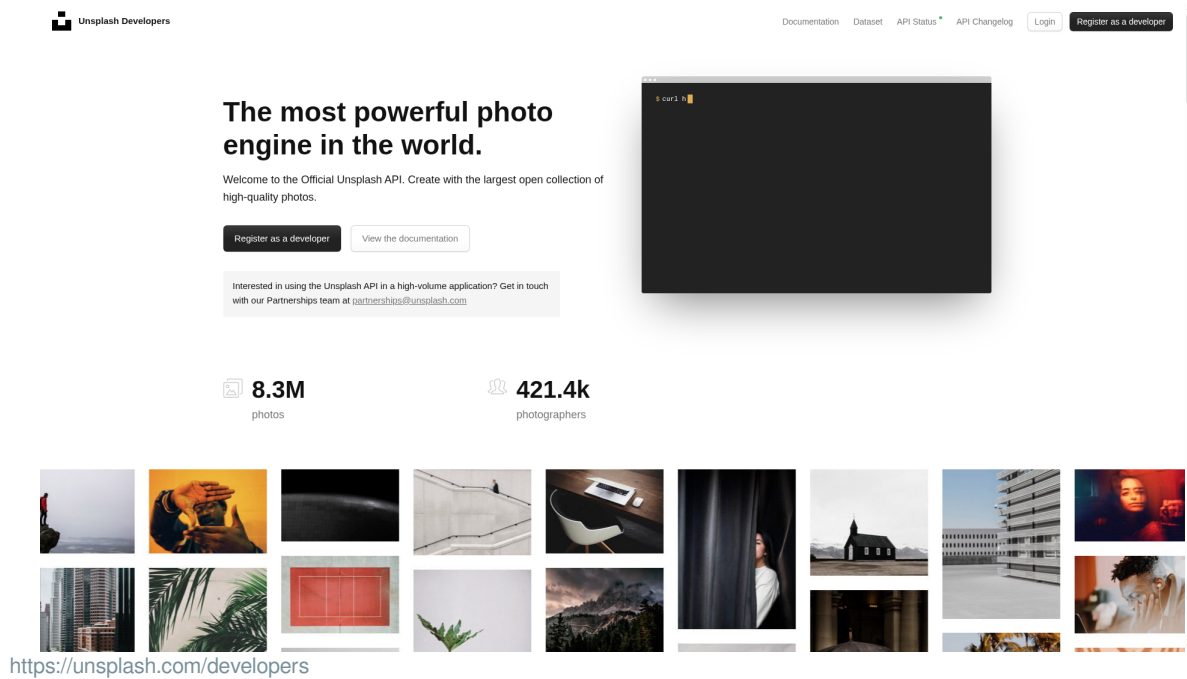

The AI successfully navigated the Unsplash Developer Portal to extract technical requirements for image hotlinking and resizing. It further explored dataset access options and the API changelog, though the final registration step was prevented by automated security measures.

Step-by-Step Walkthrough

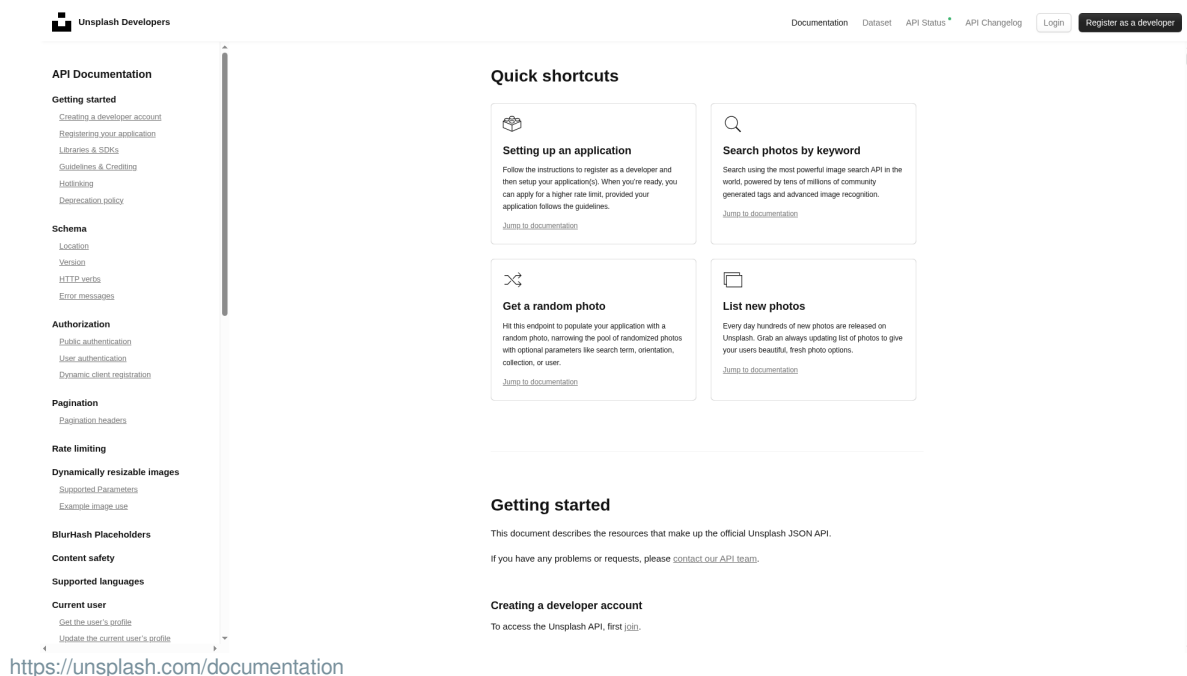

1. Developer Portal Landing Page

The AI starts the workflow on the Unsplash Developers homepage to explore available resources.

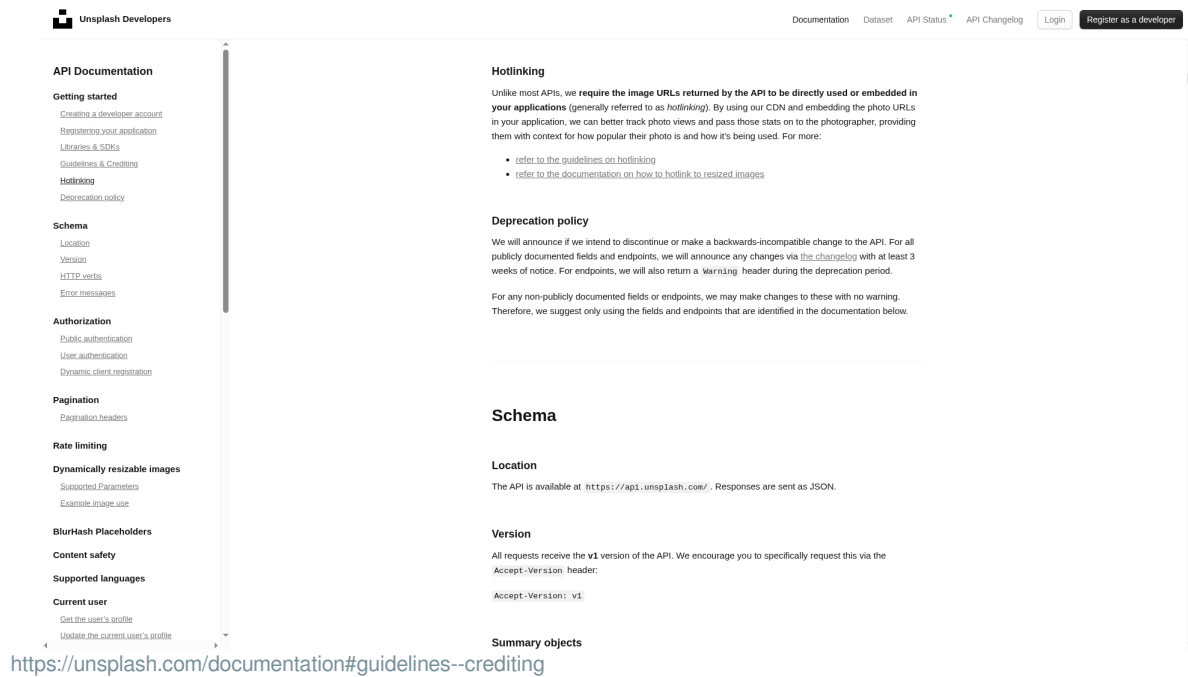

2. Navigating API Documentation

The AI accesses the documentation overview to find technical integration guides and shortcuts.

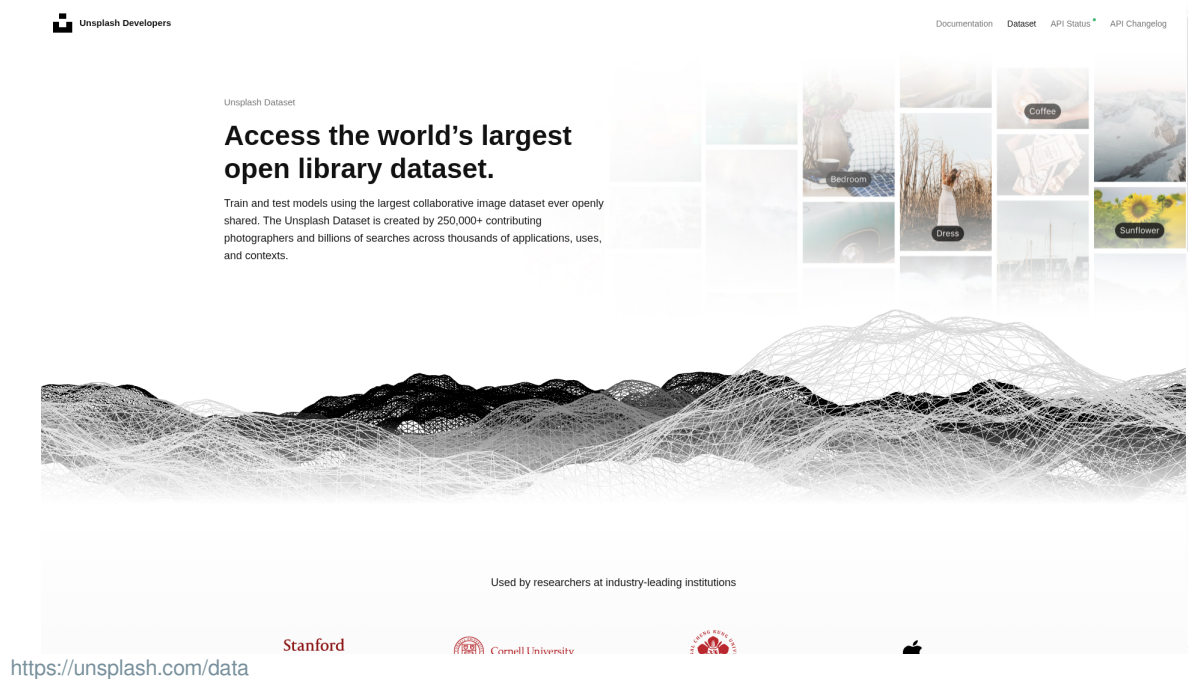

3. Hotlinking Technical Requirements

The AI locates the specific mandatory guidelines and CDN usage rules for hotlinking images.

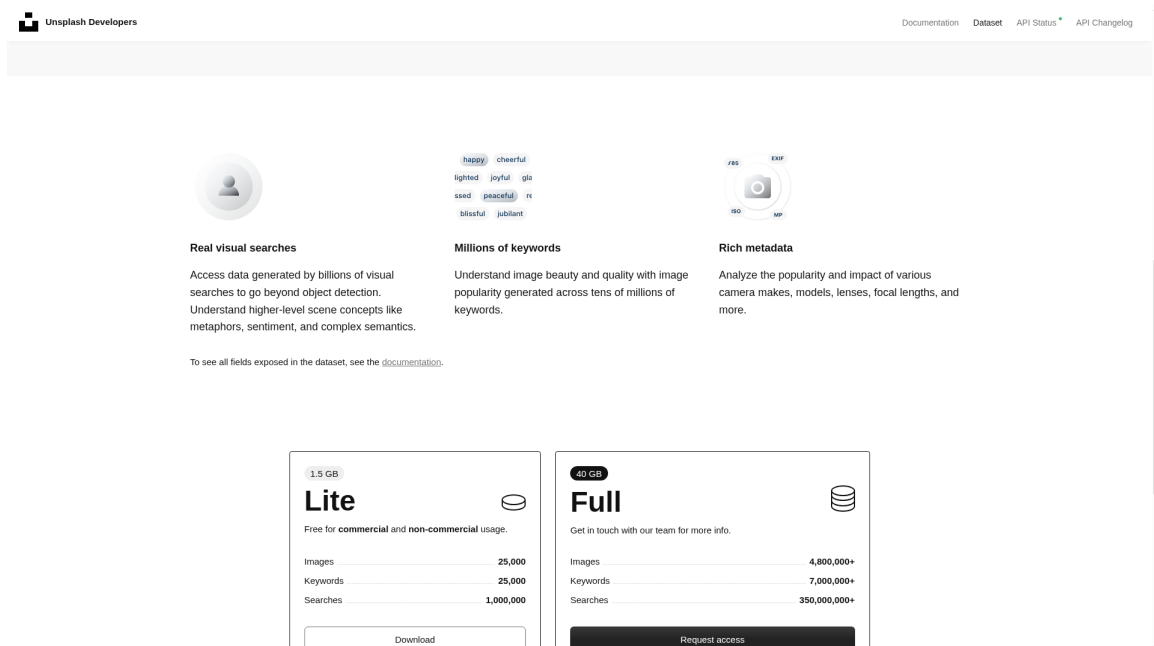

4. Unsplash Dataset Overview

The AI navigates to the data section to explore options for large-scale image library datasets.

5. Dataset Access Options

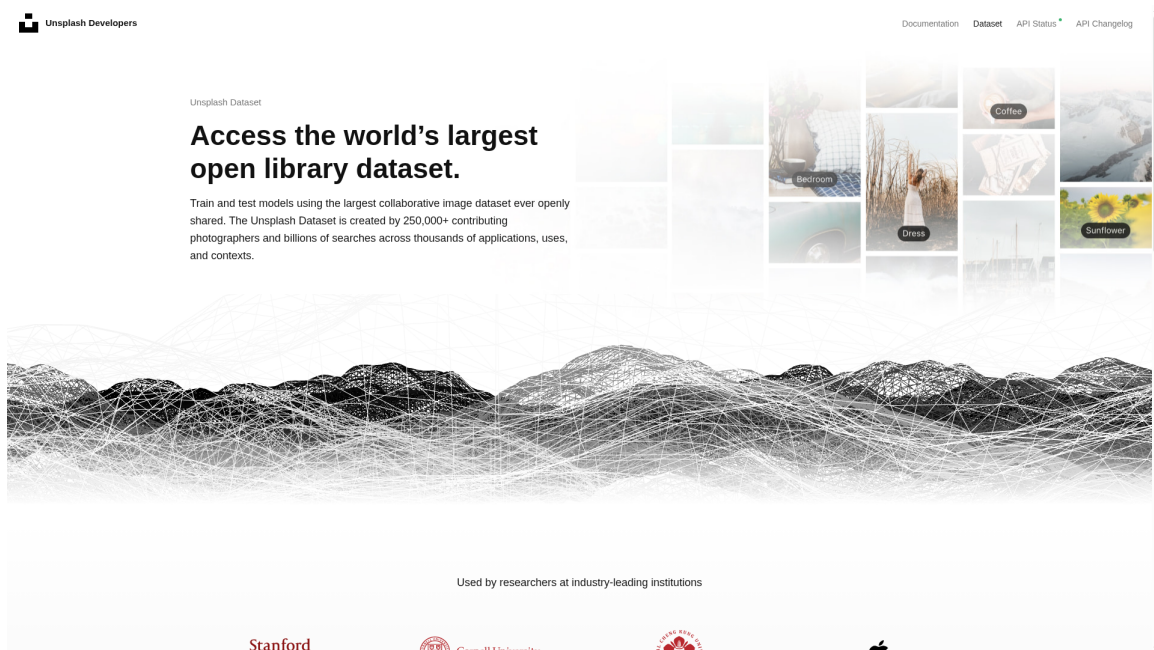

The AI identifies the differences and requirements for the Lite and Full dataset versions.

7. API Changelog Review

The AI accesses the chronological list of API updates, including recent feature additions and sunsets.

8. Security Block Encountered

The AI's attempt to access the developer registration page is blocked by the site's security system.
